DETAILED ACTION

1. The Examiner's previous Office Action made final on (12/15/04) is vacated.

Allowable Subject Matter

2. The indicated allowability of claims 1-4 is withdrawn in view of the newly discovered reference(s) to Mulcahy et al (6,002,746). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Mulcahy et al (6,002,746 hereinafter Mulcahy).

Regarding claim 1. Mulcahy teaches a method for correlating a subscriber unit to a physical port in a point-to-point or to a point-to-multipoint wire line network (title, abstract) comprising:

prompting an installer to manually input a location code associated with the subscriber unit (col. 7 lines 64-67);

receiving the location code in the subscriber unit (col. 7 lines 64-67);

transmitting the location code via the network to a central repository (col. 7 lines 29-32); and

Art Unit: 2643

storing the location code in the central repository to associate the location code with the physical port (col. 8 lines 7-9).

Regarding claim 2. Mulcahy teaches checking the location code for errors before storing (col. 8 lines 11-13);

Upon finding an error, transmitting an instruction to the subscriber unit to indicate error to the installer (col. 8 lines 14-22); and upon finding no errors, storing the location code (col. 7 lines 29-32).

Regarding claim 4. Mulcahy teaches transmitting a site code (col. 7 lines 52-57) and

storing the site code in the central repository (col. 7 lines 29-32, col. 8 lines 7-9).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2643

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mulcahy et al (6,002,746 hereinafter Mulcahy) in view of Kennedy et al (6,163,594 hereinafter Kennedy).

Regarding claim 3. Mulcahy does not explicitly show prompting the installer to reinput the location code. However, Mulcahy discloses that if an error is detected, the operator can instruct a field engineer (i.e. installer) to perform appropriate operations to correct the error (col. 8 lines 19-22).

Kennedy allows the craftsperson to re-input the location code (col. 2 lines 51-60, col. 3 lines 33-66, col. 7 lines 39-41, col. 10 lines 1-3, lines 29-31, see "reentering the correct directory number" in column 11).

It would have been obvious to any one of ordinary skill in the art at the time of invention to utilize the teachings of Kennedy into the teachings of Mulcahy in order to allow engineer the opportunity to perform appropriate operations to correct the error.
